Analytical Cybersecurity professional specializing in threat intelligence, OSINT methodologies, and security dashboarding. Eager to leverage a strong foundation in offensive security (eJPT) and practical home lab engineering to support enterprise-level threat mitigation strategies. Capable of utilizing the MITRE ATT&CK framework to map vulnerabilities, track threat actor TTPs, and translate technical data into measurable security metrics and high-confidence intelligence products.

CORE COMPETENCIES

OSINT & CTI Tools:	OpenCTI, MISP, Maltego, SpiderFoot, Recon-ng, AlienVault OTX, Shodan
Threat Intelligence:	Threat Actor TTPs, MITRE ATT&CK, Indicators of Compromise (IOCs), NIST CSF
Data & Dashboards:	Python, SQL, Grafana, InfluxDB, Large-scale Log Analysis
Security Infrastructure:	Linux CLI, OPNsense, VirtualBox, iptables, Network Segmentation

CYBERSECURITY & THREAT INTELLIGENCE PROJECTS

Intelligence Metrics & Security Dashboarding (Home Lab Engineering)

- Deployed an **OpenCTI** platform via Docker to aggregate, normalize, and visualize STIX-formatted threat intelligence feeds from **AlienVault OTX**.
- Architected a secure internal laboratory utilizing VirtualBox and OPNsense, effectively routing custom traffic and defining strict access controls via iptables.
- Developed centralized data visualization dashboards utilizing **Grafana and InfluxDB** to continuously monitor network anomalies, creating data connections for security KPIs.

Advanced Threat Analysis & Offensive Security

- Conducted open-source intelligence (OSINT) gathering and network enumeration utilizing tools like Recon-ng and Shodan to map attack surfaces and monitor for entry points.
- Applied the **MITRE ATT&CK framework** to systematically analyze threat actor tactics, techniques, and procedures (TTPs) across varied Linux and Windows targets.
- Synthesized complex technical processes and vulnerability data into concise analytical reports for technical incident response teams.

Enterprise Security Policy & NIST Framework Alignment

- Authored a comprehensive corporate security policy to align organizational defenses with Governance, Risk, and Compliance (GRC) frameworks, specifically integrating the **NIST CSF**.

EDUCATION & CERTIFICATIONS

Associate of Applied Science in Cyber Security / Information Assurance

Ivy Tech Community College, Columbus, IN | GPA: 3.0

August 2025

- eLearnSecurity Junior Penetration Tester (eJPT)** - INE (March 2026)
- CompTIA Security+** (August 2025)
- Technical Certificate in SOC Specialist**
